TECHNICAL SPECIFICATION

Origin

Flexiframe is produced and developed in Sweden by Mark Bric AB.

Material

The frame profiles are produced in durable Polyvinyl-plastic. The corner pieces are produced in polypropylene-plastic.

Colours

Profiles are produced in the following standard colours: White (51), grey (52), red (53), blue (54), black (55), brown (56), green (57), beige (58), metallic grey (59), yellow (60), teal (61), burgundy (62), purple (63), hunter green (64), silver (81), gold (82)

Information on frame sizes

All sizes given for the frames in brochures, price lists etc. are insert panel size (size of the panel to be inserted into the frame).

Further frame measurements are as follows:

Overall size = Panel size plus 28 mm

Visible panel size = Panel size less 20 mm

For example:

Panel size: 700 x 1000 mm

Overall size: 728 x 1028 mm

Visible panel size: 680 x 980 mm

Corner types

All frames in the trade show stands are delivered with square corners as standard.

All corners are equipped with corner locking device.

Opening of frames

All frames in the trade show stands are delivered as closed frames. On these frame sections there is a marking label on the frame profile to indicate which side of the frame to take apart. Just pull the corners out of the profile to change the infill panel.

Panels

Most panels with a maximum 5 mm thickness can be used inside the frames. Panels should be the exact size to avoid instability of display units.

"Panel lock"

The insert panels in frame sections of backwalls and other display and exhibition kits should be equipped with "panel locks". Use 4 pcs/panel; 2 pcs. on the bottom side and 2 pcs. on the top side of the panel. This will guarantee full stability of the display units.

Physical properties

Temperature

Min.temp: - 20 deg. C

Max.temp: + 50 deg. C

We recommend interior use of the frames.

UV-radiation

To minimize colour changes we recommend you to avoid darker frame colours, for example black, red and blue, in direct sun light.

Flammability

UL 94 V-O (low)

Connectors

Frame connectors are produced in zinc-plated steel.

Table tops

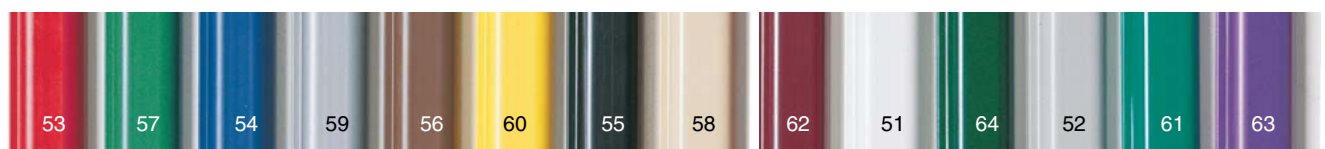

Table tops are produced in white painted aluminium. We recommend that table top loading should not exceed 30 kg.

When building table displays, the frame insert panels must be accurately cut to size and squareness. This will ensure the maximum strength and stability of the table.

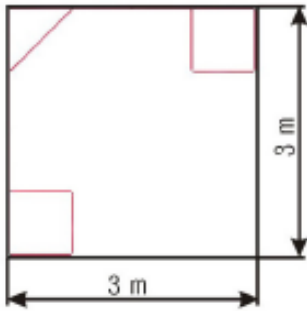

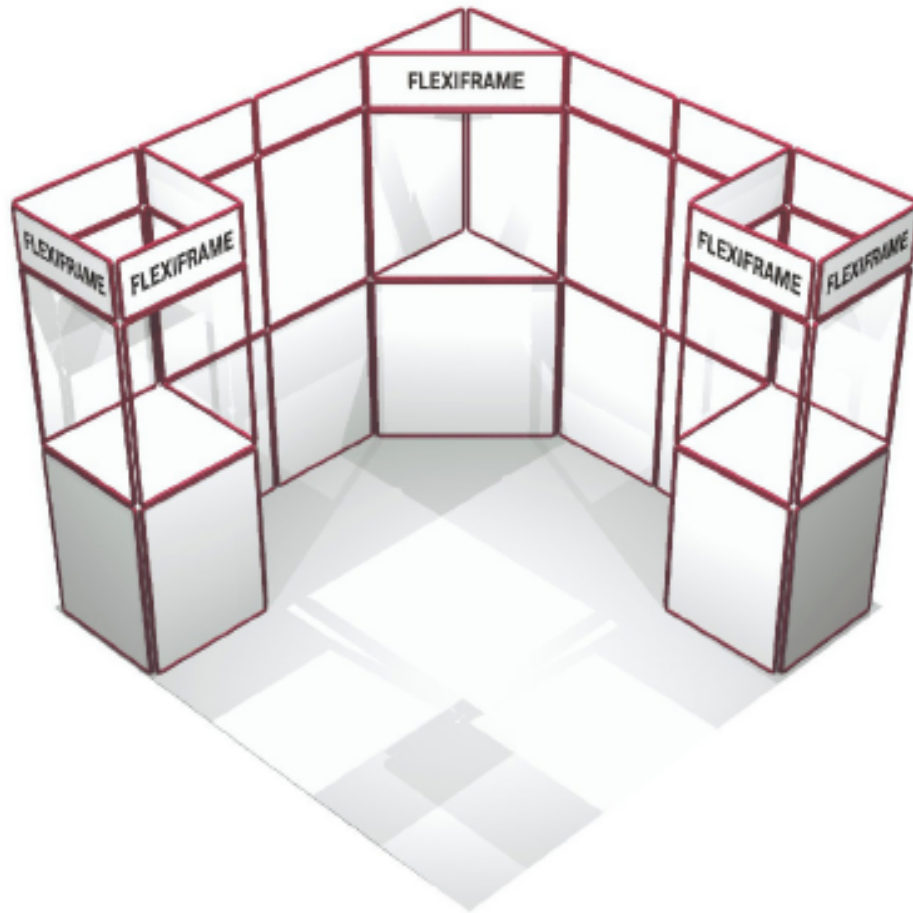

Guarantee

The Mark Bric Display system Flexiframe is guaranteed for a period of 2 years from the date of purchase against faulty workmanship or manufacture. The guarantee does not extend to damage caused by misuse or negligence.

More ISOframe Display Products to choose from

The world's first fully flexible Display & Exhibition system
 Use as a basic display wall, add more modules and build a complete exhibition stand. Add tables, show-cases, shelving units, doors, storage rooms etc. to make your stand complete. Ideal for small and medium sized stands and perfect for the self-build exhibitor.

Self-build Fabric System
 Ideal for complete exhibition stands or free-standing displays, our new fabric frame system is extremely portable and with our unique FAST-clamp connector, gives a tool-free assembly. ISOframe Fabric is the fastest all-metal textile frame available.

Large Modular Reception Counters
 The Mark Bric ISOframe programme includes a modular system of large reception counters, which can be individually designed to fit any reception area or trade show stand. Straight or curved and with plenty of inner shelving.

Other well-known brands from Mark Bric

Mark Bric produces a complete program of display & exhibition systems for retail, road show and trade show purposes.
